DANIEL O'RORKE

408-768-4570 | daniel@ororke.com | linkedin.com/in/danielororke | github.com/Daniel085 | developer.alianza.com

PROFESSIONAL SUMMARY

Product leader with 13 years in product management, 11 on developer platforms and APIs, most of it 0-to-1. Owns the developer experience for Crux, the control plane through which AI agents get governed access to live phone calls on 1,000+ operators' networks: built developer.alianza.com, the AI-built documentation system behind it, and an MCP server for the API; helped guide the structure of the Crux API with Architecture; shipped the 1.0 developer experience in September 2026. Led Vonage's video API platform through 10x growth and shipped Video Express from prototype to GA in under nine months. Led Enhanced Number Verification, a CAMARA identity API, with mobile operators and handset manufacturers. Mentored and onboarded a team of five PMs. Daily Claude Code user who builds with AI assistance and publishes on where it works and where it fails.

AREAS OF EXPERTISE

Developer Experience (DevX) | Developer Platforms & APIs | Agentic Workflows & LLMs | Identity & Access Control | Standards Participation | Developer Engagement | Platform Investment vs. Delivery | Mentoring Product Managers

PROFESSIONAL EXPERIENCE

Principal Product Manager, APIs & Developer Platforms

Jan 2026 – Present

Alianza • Remote

Own the developer-facing surface of Crux, the control plane through which AI experiences get governed access to live phone calls and voice data on 1,000+ operators' networks: public API, events and webhooks, and developer.alianza.com. Crux applies identity, policy, and consent in the network before any AI is invoked, then hands the call to a virtual agent or streams media to a post-call partner. Joined after the platform was designed; shipped the 1.0 developer experience in September 2026.

- Designed and operate the AI-built documentation system behind the portal: agents generate reference docs and code samples from the API definition, humans review, and the system states plainly where the definition leaves a gap rather than guessing
- Built developer.alianza.com, where developers learn the platform's access model (Experience, Connection, Assignment), run eligibility, connection, assignment, and activation to a live call in about ten minutes, and find the authentication guide (OAuth 2.0 grants, scoped permissions, key rotation) they integrate against; content generated by AI agents and reviewed by humans
- Built an MCP server for the Crux API so coding agents can work against the platform directly; the developer surface is designed for both human developers and the agents they increasingly work through
- Helped guide the structure of the Crux API with Architecture; jointly set the API standards engineering teams build against (RFC 9457 errors with trace IDs, cursor pagination, E.164 and UUID identifiers, deprecation paths) and review API proposals across teams
- Published the operational runbooks partners rely on in production and a known-issues page that names real failure modes; coordinated the 1.0 launch across engineering, operations, and go-to-market, with the surface serving third-party AI experience providers, the operators whose networks carry the calls, and Alianza's own provisioning systems
- Balance platform investment against partner delivery: the documentation system and API standards were built once so that each new experience provider integrates without bespoke work

Lead Product Manager

Apr 2025 – Jan 2026

Charter Communications • Denver, CO (Hybrid)

- Built the developer platform and programmable network APIs for North America's largest ISP by subscribers; defined product strategy for CAMARA network APIs exposing network identity to third-party developers under customer-consent and privacy constraints
- Carried an ambiguous, early-stage program with dependencies across network, billing, and legal organizations; standards work grounded in third-party developer needs

Expert Product Manager, Ericsson Global Network API Platform

May 2024 – Jan 2025

Vonage / Ericsson • Remote

- Led Enhanced Number Verification: the CAMARA identity-verification API was already commercial but limited, and overcame those limits by working with mobile operators and handset manufacturers; united a multi-company team across Vonage, Ericsson, and operators
- On the team delivering a single unified API platform for third parties to interact with hundreds of mobile network operators globally; CAMARA standards participation; presented the API strategy at Ericsson Innovation Days to European operators

Senior, then Expert Product Manager, Video API Platform

Apr 2020 – May 2024

Vonage • San Francisco, CA, then Remote

- Lead PM for a multi-tenant WebRTC platform used by Vonage's first-party apps, direct API customers, and third-party developers; owned client SDKs across 8 platforms
- Hired to steer the platform through 650% telehealth growth in the first six weeks of the pandemic and 850% growth for 2020, maintaining reliability through 10x scale
- Conceived and shipped Video Express, a 0-to-1 simplified video SDK: prototype-validated with customers, beta in under 3 months, GA in under 9, running 10% of the platform's 2019 minutes within a year
- Mentored and onboarded a team of 5 PMs and established the team's product process, discovery practice, and operating rhythm; drove $3M revenue capture in 6 months through targeted developer migration
- Recipient: Key Talent Award and Key Contributor Award

Senior Product Manager, SendGrid Labs

Aug 2018 – Jan 2020

Twilio • San Francisco Bay Area

- Directed SendGrid's transition from email API to multi-channel communications platform through strategic roadmap development, including M&A proposals; practiced Outcome-Driven Innovation discovery

Senior Product Manager

2017 – 2018

VoiceBase • San Francisco, CA

- Shipped the v3 REST API, SDKs, and self-service Developer Console for an AI speech-to-text platform; reduced support tickets 40%
- Product depended on integrating with other companies' telephone networks, so owned the partner side of access and provisioning; company acquired by LivePerson

Product Manager, API Platform & Developer Ecosystem

2015 – 2017

Aerohive Networks • Sunnyvale, CA

- Owned the API platform and developer ecosystem for an enterprise WiFi company: developer portal for the Identity, Location, and Configuration APIs
- Co-invented 2 patents for credential management and seamless device onboarding; led HiveSchool WebRTC product, ISTE "Best in Show"

Product Manager

2013 – 2015

Yahoo • Sunnyvale, CA

- Managed Mail Monetization and ad-targeting products for Yahoo's consumer user base; recipient of Superstar Team Award

CERTIFICATIONS, PATENTS & WRITING

- Certified Scrum Product Owner (CSPO) – Scrum Alliance
- Patents 15/073,593 (Credential Management) and 62/350,158 (Seamless Device Onboarding)
- LinkedIn articles on AI-assisted product discovery, ODI/JTBD, and the Video Express build (2025–2026); daily Claude Code user who builds with AI assistance

EDUCATION

University of California, San Diego — B.S. in Management Science, Department of Economics (Econometric Regression Modeling Honor Program; coursework in Java, C++, x86 Assembly)

University of California, Berkeley Extension — High Tech Product Marketing & Management
