Work sample: developer.alianza.com, the developer portal I built and operate for Alianza

PROFESSIONAL SUMMARY

Principal Product Manager with 13 years in product management, 11 on the platforms beneath consumer experiences at scale, most of it in B2B2C models where the end user, the integrating developer, and the paying customer are different parties. Lead PM for Vonage's video API platform, which carried telehealth visits for providers including Teladoc through 650% telehealth growth in the first six weeks of the pandemic and 10x for the year; conceived and shipped Video Express, a 0-to-1 product validated with a prototype and customer interviews, GA in under nine months. Now owns the developer-facing surface of Alianza's Crux, the control plane through which AI companies get governed access to live phone calls on 1,000+ operators' networks, where consent, identity, and policy are applied before any AI touches a call; operates an AI-built documentation system in production. Thinks in systems across network, partner, and platform layers; practices Outcome-Driven Innovation discovery; builds with AI assistance daily and publishes on where AI should and should not be trusted.

AREAS OF EXPERTISE

Multi-Year Vision & Roadmap | Systems Thinking Across Partner Integrations | B2B2C & White-Label Platforms | Technical Fluency (APIs, Webhooks, MCP) | Enterprise Partner Collaboration | Telehealth at Scale

PROFESSIONAL EXPERIENCE

Principal Product Manager, APIs & Developer Platforms

Jan 2026 – Present

Alianza • Remote

Own the developer-facing surface of Crux, the control plane through which AI experiences get governed access to live phone calls and voice data on 1,000+ operators' networks: public API, events and webhooks, and developer.alianza.com. Crux applies identity, policy, and consent in the network before any AI is invoked, then hands the call to a virtual agent or streams media to a post-call partner. Operators keep the customer relationship and offer the experiences under revenue-share, referral, or white-label models. Joined after the platform was designed; shipped the 1.0 developer experience in September 2026.

- Designed and operate the AI-built documentation system behind the portal: agents generate reference docs and code samples from the OpenAPI definition, humans review, and the system states plainly where the definition leaves a gap rather than guessing; defined where the system is trusted and where a human stays in the loop, and iterate on it from what developers hit in production
- Built developer.alianza.com, where developers learn the platform's access model (Experience, Connection, Assignment), run eligibility, connection, assignment, and activation to a live call in about ten minutes, and find the authentication guide (OAuth 2.0 grants, scoped permissions, key rotation) they integrate against; built an MCP server for the Crux API so coding agents can discover and call it
- Helped guide the structure of the Crux API with Architecture; jointly set the API standards engineering teams build against (RFC 9457 errors with trace IDs, cursor pagination, E.164 and UUID identifiers, deprecation paths) and review API proposals across teams
- The developer surface serves three audiences at once: third-party AI experience providers, the operators whose networks carry the calls, and Alianza's own provisioning systems; the standards and documentation system were built once so each new experience provider integrates without bespoke Alianza-side work
- Published the operational runbooks partners rely on in production (webhook desynchronization recovery, seed-then-stream user counting) and a known-issues page that names real failure modes; coordinated the 1.0 launch across engineering, operations, and go-to-market with experience providers integrating in sandbox during early access

Lead Product Manager

Apr 2025 – Jan 2026

Charter Communications • Denver, CO (Hybrid)

- Built the developer platform and programmable network APIs for North America's largest ISP by subscribers; defined product strategy for CAMARA network APIs exposing network identity to third-party developers under customer-consent and privacy constraints
- Partnered with engineering and architecture through an ambiguous, early-stage program with dependencies across network, billing, and legal organizations

Expert Product Manager, Ericsson Global Network API Platform

May 2024 – Jan 2025

Vonage / Ericsson • Remote

- Led Enhanced Number Verification: the CAMARA identity-verification API was already commercial but limited, and overcame those limits by working with mobile operators and handset manufacturers on the product decisions; united a multi-company team across Vonage, Ericsson, and operators
- On the team delivering a single unified API platform for third parties to interact with hundreds of mobile network operators globally; presented the API strategy at Ericsson Innovation Days to European operators

Senior, then Expert Product Manager, Video API Platform

Apr 2020 – May 2024

Vonage • San Francisco, CA, then Remote

- Lead PM for a multi-tenant WebRTC platform used by Vonage's first-party apps, direct API customers, and third-party developers, including telehealth providers such as Teladoc whose patients were the end users; owned client SDKs across 8 platforms
- Hired to steer the platform through 650% telehealth growth in the first six weeks of the pandemic and 850% growth for 2020, maintaining reliability through 10x scale while patients and clinicians depended on it
- Conceived and shipped Video Express, a 0-to-1 simplified video product when lockdown-era customers moved from 2-4 party calls to 25-100 party sessions: validated with a lean prototype and customer interviews, beta in under 3 months, GA in under 9, running 10% of the platform's 2019 minutes within a year; automatic layout, bandwidth adaptation, sub-300 ms latency
- Drove $3M revenue capture in 6 months through targeted developer migration; first of 5 PMs hired into the Video group, onboarded and oriented the other four, set up the structures for coordinating work and prioritizing across the team, and created the group's PM process, later adopted as a company-wide framework
- Recipient: Key Talent Award and Key Contributor Award

Senior Product Manager, SendGrid Labs

Aug 2018 – Jan 2020

Twilio • San Francisco Bay Area

- Directed SendGrid's transition from email API to multi-channel communications platform through strategic roadmap development, including M&A proposals; practiced Outcome-Driven Innovation discovery, including survey design and K-means clustering of customer outcomes to rank what to build

Senior Product Manager

2017 – 2018

VoiceBase • San Francisco, CA

- Shipped the v3 REST API, SDKs, and self-service Developer Console for an AI speech-to-text platform; reduced support tickets 40%
- Product depended on integrating with other companies' telephone networks, so owned the partner side of access and provisioning; company acquired by LivePerson

Product Manager, API Platform & Developer Ecosystem

2015 – 2017

Aerohive Networks • Sunnyvale, CA

- Product manager for the API platform and developer ecosystem of an enterprise WiFi company: built sample apps, created videos for the developer community, wrote docs, and gave feedback on the Identity, Location, and Configuration APIs
- Co-invented 2 patents for credential management and seamless device onboarding; led HiveSchool WebRTC product, ISTE "Best in Show"

Product Manager

2013 – 2015

Yahoo • Sunnyvale, CA

- Managed Mail Monetization and ad-targeting products for Yahoo's consumer user base, working with design and analytics teams on experiences measured in engagement and revenue; recipient of Superstar Team Award

CERTIFICATIONS, PATENTS & WRITING

- Certified Scrum Product Owner (CSPO) – Scrum Alliance
- Patents 15/073,593 (Credential Management) and 62/350,158 (Seamless Device Onboarding)
- LinkedIn articles on AI-assisted product discovery, ODI/JTBD, and the Video Express build (2025–2026); daily Claude Code user who builds with AI assistance

EDUCATION

University of California, San Diego — B.S. in Management Science, Department of Economics (Econometric Regression Modeling Honor Program; coursework in Java, C++, x86 Assembly)

University of California, Berkeley Extension — High Tech Product Marketing & Management
