PROFESSIONAL SUMMARY

Principal Product Manager with 13 years in product management, 11 on enterprise, developer-facing API products distributed through partners. Owns the developer-facing surface of Alianza's Crux (1.0.0, September 2026), the control plane through which AI companies get governed access to live phone calls on 1,000+ operators' networks: built developer.alianza.com, helped guide the structure of the Crux API with Architecture, and jointly set the API standards engineering teams build against. Built network APIs with Ericsson for hundreds of mobile network operators, and led Vonage's video API platform through 10x growth while capturing $3M in migration revenue in six months. Operates with high autonomy across company boundaries, from carrier partners to enterprise security teams, and writes to drive clarity: public API documentation, standards, and published essays on product discovery.

AREAS OF EXPERTISE

Enterprise API Strategy | Partner & Channel Distribution | Authentication, Rate Limiting & Compliance | SDKs & Developer Experience | Cross-Company Stakeholder Management | Revenue & Adoption Outcomes | Telecom & Carrier Ecosystems | Written Strategy & Standards

PROFESSIONAL EXPERIENCE

Principal Product Manager, APIs & Developer Platforms

Jan 2026 – Present

Alianza • Remote

Own the developer-facing surface of Crux, the control plane that gives AI experiences governed access to live phone calls and voice data on 1,000+ operators' networks, with identity, consent, and policy applied before any AI is invoked: public API, events and webhooks, developer.alianza.com. Joined after the platform was designed; shipped the 1.0 developer experience in September 2026.

- Built developer.alianza.com and operate the AI-built documentation system behind it, where partners go from credentials to a live call in about ten minutes and find the authentication guide (OAuth 2.0 grants, scoped permissions, key rotation), rate-limit and back-off guidance, and error conventions they integrate against; content generated by AI agents and reviewed by humans
- Helped guide the structure of the Crux API with Architecture, balancing security with developer experience; jointly set the API standards engineering teams build against and review API proposals across teams
- Shipped through a two-sided partner channel from day one: AI experience providers on one side, the operators who carry the calls and monetize the experiences on the other; one integration reaches every operator without code changes
- Ran discovery with AI developers and operator integrators, including an API developer-experience study, and turned it into requirements, eligibility rules, and quickstarts that reach a live call in about ten minutes
- Published the operational runbooks partners use in production for desynchronization recovery and seat counting; the documentation system generates reference docs from the API definition and states plainly where the definition leaves a gap
- Coordinated the 1.0 launch across engineering, operations, and go-to-market, with Experience Providers integrating in sandbox during early access

Lead Product Manager

Apr 2025 – Jan 2026

Charter Communications • Denver, CO (Hybrid)

- Built the developer platform and programmable network APIs for North America's largest ISP by subscribers; defined product strategy for CAMARA network APIs exposing network capabilities to third-party developers under customer-consent, privacy, and regulatory constraints
- Operated with high autonomy in an ambiguous, early-stage program with dependencies across network engineering, billing, legal, and architecture organizations

Expert Product Manager, Ericsson Global Network API Platform

May 2024 – Jan 2025

Vonage / Ericsson • Remote

- Led Enhanced Number Verification through a global partner channel: Vonage built it, Ericsson distributed it, and mobile network operators ran it; the existing commercial API had significant limitations, and overcame them by aligning operators and handset manufacturers across three company boundaries
- On the team delivering a single unified API platform for third parties to reach hundreds of mobile network operators globally; presented the API strategy at Ericsson Innovation Days to European operators and evaluated API offerings for partner and developer adoption potential

Senior, then Expert Product Manager, Video API Platform

Apr 2020 – May 2024

Vonage • San Francisco, CA, then Remote

- Drove $3M revenue capture in 6 months through targeted developer migration and GTM materials that responded to market events; owned the adoption and revenue outcomes for the migration program
- Lead PM for a high-scale, high-reliability WebRTC platform used by Vonage's first-party apps, direct API customers, and third-party developers; owned client SDKs across 8 platforms
- Hired to steer the platform through 650% telehealth growth in the first six weeks of the pandemic and 850% growth for 2020, maintaining reliability through 10x scale
- Conceived and shipped Video Express, a simplified video SDK: prototype-validated with enterprise customers, beta in under 3 months, GA in under 9, running 10% of the platform's 2019 minutes within a year
- Mentored and onboarded a team of 5 PMs and established the team's product process; recipient of Key Talent and Key Contributor Awards

Senior Product Manager, SendGrid Labs

Aug 2018 – Jan 2020

Twilio • San Francisco Bay Area

- Directed SendGrid's transition from email API to multi-channel communications platform through strategic roadmap development, including M&A proposals; ran Outcome-Driven Innovation discovery with enterprise senders to prioritize platform capabilities by measured outcomes

Senior Product Manager

2017 – 2018

VoiceBase • San Francisco, CA

- Shipped the v3 REST API, SDKs, and self-service Developer Console for an AI speech-to-text platform; reduced support tickets 40%
- Product depended on integrating with other companies' telephone networks, so owned the partner side of access and provisioning; company acquired by LivePerson

Product Manager, API Platform & Developer Ecosystem

2015 – 2017

Aerohive Networks • Sunnyvale, CA

- Owned the developer portal for the enterprise WiFi platform's Identity, Location, and Configuration APIs
- Co-invented 2 patents for credential management and seamless device onboarding; led HiveSchool WebRTC product, ISTE "Best in Show"

Product Manager

2013 – 2015

Yahoo • Sunnyvale, CA

- Owned Mail Monetization and ad-targeting products, measured on advertising revenue across Yahoo's consumer user base; recipient of Superstar Team Award

CERTIFICATIONS, PATENTS & WRITING

• Certified Scrum Product Owner (CSPO) – Scrum Alliance
• Patents 15/073,593 (Credential Management) and 62/350,158 (Seamless Device Onboarding)
• LinkedIn articles on AI-assisted product discovery, ODI/JTBD, and the Video Express build (2025–2026); daily Claude Code user who builds with AI assistance

EDUCATION

University of California, San Diego — B.S. in Management Science, Department of Economics (Econometric Regression Modeling Honor Program; coursework in Java, C++, x86 Assembly)

University of California, Berkeley Extension — High Tech Product Marketing & Management
