DANIEL O'RORKE

408-768-4570 | daniel@ororke.com | linkedin.com/in/danielororke | github.com/Daniel085 | developer.alianza.com

PROFESSIONAL SUMMARY

Principal Product Manager with 13 years in product management, 11 on enterprise, developer-facing API products. Owns the developer-facing surface of Alianza's Crux (1.0.0, September 2026), the control plane through which AI companies get governed access to live phone calls on 1,000+ operators' networks: built developer.alianza.com, the AI-based documentation writing behind it, and an MCP server for the API; helped guide the structure of the Crux API with Architecture; jointly set the API standards engineering teams build against. Built network APIs with Ericsson for hundreds of mobile network operators, led Enhanced Number Verification, a CAMARA identity API, with operators and handset manufacturers, and led Vonage's video API platform through 10x growth. First of five PMs hired into Vonage Video; onboarded the rest and created the PM process later adopted company-wide. Operates with high autonomy across company boundaries and builds with AI assistance daily.

AREAS OF EXPERTISE

Developer Experience (DevX) | Developer Platforms & APIs | Agentic Workflows & LLMs | Identity & Access Control | Network API Standards (CAMARA) | Developer Engagement | Platform Investment vs. Delivery | Mentoring Product Managers

PROFESSIONAL EXPERIENCE

Principal Product Manager, APIs & Developer Platforms

Jan 2026 – Present

Alianza • Remote

Own the developer-facing surface of Crux, the control plane through which AI experiences get governed access to live phone calls and voice data on 1,000+ operators' networks: public API, events and webhooks, and developer.alianza.com. Crux applies identity, policy, and consent in the network before any AI is invoked, then hands the call to a virtual agent or streams media to a post-call partner. Joined after the platform was designed; shipped the 1.0 developer experience in September 2026.

- Designed and operate the AI-built documentation system behind the portal: agents generate reference docs and code samples from the API definition, humans review, and the system states plainly where the definition leaves a gap rather than guessing
- Built developer.alianza.com, where developers learn the platform's access model (Experience, Connection, Assignment), run eligibility, connection, assignment, and activation to a live call in about ten minutes, and find the authentication guide (OAuth 2.0 grants, scoped permissions, key rotation) they integrate against; content generated by AI agents and reviewed by humans
- Built an MCP server for the Crux API so coding agents can work against the platform directly; the developer surface is designed for both human developers and the agents they increasingly work through
- Helped guide the structure of the Crux API with Architecture; jointly set the API standards engineering teams build against (RFC 9457 errors with trace IDs, cursor pagination, E.164 and UUID identifiers, deprecation paths) and review API proposals across teams
- Published the operational runbooks partners rely on in production and a known-issues page that names real failure modes; coordinated the 1.0 launch across engineering, operations, and go-to-market, with the surface serving third-party AI experience providers, the operators whose networks carry the calls, and Alianza's own provisioning systems
- Balance platform investment against partner delivery: the documentation system and API standards were built once so that each new experience provider integrates without bespoke work

Lead Product Manager

Apr 2025 – Jan 2026

Charter Communications • Denver, CO (Hybrid)

- Built the developer platform and programmable network APIs for North America's largest ISP by subscribers; defined product strategy for CAMARA network APIs exposing network identity to third-party developers under customer-consent and privacy constraints
- Carried an ambiguous, early-stage program with dependencies across network, billing, and legal organizations; attended CAMARA standards meetings and contributed feedback grounded in third-party developer needs

Expert Product Manager, Ericsson Global Network API Platform

May 2024 – Jan 2025

Vonage / Ericsson • Remote

- Led Enhanced Number Verification: the CAMARA identity-verification API was already commercial but limited, and overcame those limits by working with mobile operators and handset manufacturers; united a multi-company team across Vonage, Ericsson, and operators
- On the team delivering a single unified API platform for third parties to interact with hundreds of mobile network operators globally; presented the API strategy at Ericsson Innovation Days to European operators

Senior, then Expert Product Manager, Video API Platform

Apr 2020 – May 2024

Vonage • San Francisco, CA, then Remote

- Lead PM for a multi-tenant WebRTC platform used by Vonage's first-party apps, direct API customers, and third-party developers; owned client SDKs across 8 platforms
- Hired to steer the platform through 650% telehealth growth in the first six weeks of the pandemic and 850% growth for 2020, maintaining reliability through 10x scale
- Conceived and shipped Video Express, a 0-to-1 simplified video SDK: prototype-validated with customers, beta in under 3 months, GA in under 9, running 10% of the platform's 2019 minutes within a year
- First of 5 PMs hired into the Video group: onboarded and oriented the other four, set up the structures for coordinating work and prioritizing uniformly across the team, and created the group's PM process, later adopted as a company-wide framework; drove $3M revenue capture in 6 months through targeted developer migration
- Recipient: Key Talent Award and Key Contributor Award

Senior Product Manager, SendGrid Labs

Aug 2018 – Jan 2020

Twilio • San Francisco Bay Area

- Directed SendGrid's transition from email API to multi-channel communications platform through strategic roadmap development, including M&A proposals; practiced Outcome-Driven Innovation discovery

Senior Product Manager

2017 – 2018

VoiceBase • San Francisco, CA

- Shipped the v3 REST API, SDKs, and self-service Developer Console for an AI speech-to-text platform; reduced support tickets 40%
- Product depended on integrating with other companies' telephone networks, so owned the partner side of access and provisioning; company acquired by LivePerson

Product Manager, API Platform & Developer Ecosystem

2015 – 2017

Aerohive Networks • Sunnyvale, CA

- Owned the API platform and developer ecosystem for an enterprise WiFi company: developer portal for the Identity, Location, and Configuration APIs
- Co-invented 2 patents for credential management and seamless device onboarding; led HiveSchool WebRTC product, ISTE "Best in Show"

Product Manager

2013 – 2015

Yahoo • Sunnyvale, CA

- Managed Mail Monetization and ad-targeting products for Yahoo's consumer user base; recipient of Superstar Team Award

CERTIFICATIONS, PATENTS & WRITING

- Certified Scrum Product Owner (CSPO) – Scrum Alliance
- Patents 15/073,593 (Credential Management) and 62/350,158 (Seamless Device Onboarding)
- LinkedIn articles on AI-assisted product discovery, ODI/JTBD, and the Video Express build (2025–2026); daily Claude Code user who builds with AI assistance

EDUCATION

University of California, San Diego — B.S. in Management Science, Department of Economics (Econometric Regression Modeling Honor Program; coursework in Java, C++, x86 Assembly)

University of California, Berkeley Extension — High Tech Product Marketing & Management
