Work sample: developer.alianza.com

Dear G2 Hiring Team,

Your posting describes a product manager who owns the APIs, integrations, developer portal, and MCP surfaces that take G2's data to market, and who works directly with code when that is the fastest way to validate an approach. That is the job I did at Alianza through November 2026, for a different kind of data.

At Alianza I owned the developer-facing surface of Crux, the control plane through which AI companies get governed access to live phone calls on more than a thousand operators' networks: the public API, events and webhooks, and developer.alianza.com. I built the portal and the AI-built documentation system behind it, which generates reference docs and code samples from the API definition and reports where the definition leaves a gap instead of filling it in. I built the MCP server prototype for the API so coding agents could discover and call it, and I prototyped against the API myself before handing the integration path to engineering. I reviewed, critiqued, and proposed APIs, keeping Architecture in the loop, and the standards we set include the deprecation paths partners rely on when an integration changes.

Two earlier results match your goals more directly. At VoiceBase I shipped the v3 REST API, SDKs, and developer console for an AI speech-to-text platform and cut support tickets 40%, for a business whose revenue depended on customers integrating successfully. At Vonage I ran a developer-migration campaign that moved customers from legacy integrations onto the current platform and captured $3M in six months, and I led the video API through 10x growth without losing reliability.

Where I am lighter: I have not sold data licenses or run a commercial data product, and B2B software-review data is new to me. I have worked beside sales and partnerships on every platform I have owned, and I learn a customer base through discovery interviews, a method I have practiced since SendGrid Labs and now run with AI agents doing the preparation and synthesis.

My role at Alianza ended in November, so I am available now. I would welcome a conversation about which of the four goals you would want tackled first.
